

STANLEY® JETCUT™ BLADE ARMOR™ 450 MM SPECIAL PARQUET HANDSAW

- The 450mm STANLEY® JETCUT™ BLADE ARMOR™ 11 tooth/inch special parquet handsaw offers the perfect combination of speed, durability, comfort, precision and control
- This saw has triple-bevel serration for optimum cutting speed and efficiency.
- The serration has also been induction hardened for exceptional performance and durability and a PTFE protective coating has been applied to the blade to reduce friction when cutting
- Robust, the JETCUT™ saw is made in France with an improved construction of the handle screwed to the blade for ultimate strength
- Made from 0.85 mm C75S steel, it offers minimum bending when cutting for greater control
- The handle includes a 45° and 90° cutting guide
- The JETCUT™ handsaw's wide handle offers excellent comfort during prolonged applications, and is fully embedded for ultimate grip and control
- Wide finger rest adapts to all hand sizes and cutting styles
- Its robust, reusable clip-on blade guard protects the saw blade during transport, and its hanging hole makes it easy to store
- Each JETCUT™ saw is colour coded for quick and efficient identification
- With 11 teeth/inch, the JETCUT™ BLADE ARMOR™ special parquet handsaw is ideal for finishing work, such as cutting parquet floors
